REVIEW

For the professional program and studying process of the first (bachelor) level of higher education in the area of knowledge:

02 "Culture and art"
in the specialty
026 "Performing Arts"

As the Director of Lee Academy Dance & Performing Arts in Australia, I understand how important it is to provide quality education for students and keep a continuous high level of professionalism.

That is why I was pleased that the students of Kyiv Municipal Academy of Performing and Circus Arts who are studying in our Academy according to the agreement of collaboration between two institutions are well prepared and well trained.

I can definitely admit that the program specialty "Performing & Variety Arts" has provided outstanding skills and education, it provides to students a strong liberal arts education combined with rigorous technique-based training that supports individual development of the dancer, artist and dance educator.

As a result, students are prepared to enter the professional world as dancers, choreographers, teachers and leaders in the arts.

Each educational institution has a goal – to provide a quality studying process and to give knowledge to their students. The success of achieving such a goal depends upon how the studying program is constructed.

So, I am glad that our partners found a perfect combination of theoretical and practical knowledge that they implement during the professional program "Performing & Variety Arts" and the students of Kyiv Municipal Academy of Performing and Circus Arts can realize their maximum potential.

Best Regards,

Jo Cotterill
Studio Director
Lee Academy Fulltime
